Saint's Alternative Cloud Textures

٢٦ آب, ٢٠٢٢ ٠٣:٤٤ ص

INSTALLATION :

1.OpenIV or Codewalker required

2.Before you do anything, make sure to backup your mods folder. If something breaks or goes wrong

3.After that, make sure you have a copy of update.rpf in your mods folder. Copy it from the game's update folder in OIV if not.

4.Next, follow this path in OIV or Codewalker: Grand Theft Auto V\mods\update\update.rpf\x64\levels\gta5

5.drag and drop the cloudhats folder inside the "required" folder onto that path

6.Once that's done you can now go inside the cloudhats.rpf and replace all the textures that you want.

7.(This is done to save extra space and overrides the files globally instead of the traditional/old method of the x64.rpf files)

8.Done!
